Play

Streaming / OTT / VOD / IPTV / Catch-Up TV

TMG | Digital Lab has extensive experience in encoding services for OTT and VOD platforms in Latin America. We can adapt and process content fulfilling the most demanding technical requirements. From the reception of the master files and materials via Aspera, Signiant or FTP, we can create specific metadata, adapt promotional materials, convert and synchronize subtitles and perform quality control for direct ingest and publication in the most modern on-demand platforms.

Broadcast

TV / Cable

Localize your media by providing the most accurate content for audiences everywhere. Deliver file-based masters that meet the highest technical specifications for imaging, graphics, inserts, sound, dubbing, and subtitles. We can handle the most complex sourcing, materials, and deliveries to improve your capabilities and sales.

Cinema

We provide high-end technologies and services during development, assembly, post-production, distribution or exhibition. Dealing with complex workflows, we provide color correction and grading, vfx, titling and mastering to deliver versioned digital cinema packages [DCP] and digital file-based deliveries.

Film restoration

35/16mm negative & positive

We remain passionate about film restoration and re-mastering to protect, enhance and preserve priceless artistic and cultural heritage. TMG is an alternative to the high cost of major companies to revitalize aged materials and restore their original look, color and sound to make them look like new and win new sales and business.

TMG Digital Lab is a division of
The Martian Group Inc.
