In case of contact, wash the affected areas with water immediately and

continue washing for fifteen minutes. Seek medical attention if irritation persists.

Disposal: Dispose of contents in accordance with local regulations.

Complexed Boron Liquid Fertilizer

Product information:

A water-based formulation intended for agricultural use for plant nutrition, suitable for soil and foliar applications.

Directions and General Recommendations

ACTOBOR is a concentrate. Never apply without first diluting or phytotoxicity may result.

Foliar Application: Apply 2 to 4 quarts per acre as needed on a 10-14 day schedule. When rates of over 2 quarts are required, split applications of 2 quarts or less are recommended. Avoid foliar applications when plants are under stress due to lack of moisture.

Soil Application: Maintenance: 1-3 qt/acre - Mild deficiency: 2-6 qt/acre High deficiency: 1-3 gal/acre

Dilute Application: Apply the suggested rate of this product in enough water for proper coverage.

Concentrate Application: Use up to 2 quarts of this product in a minimum of 25 gallons of water per acre.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil test or plant analysis recommendation.

ATTENTION: This product contains boron; use on any crops other than those recommended may result in serious injury to the crops. Always jar test new combinations for compatibility prior to field mixing.
