A MICRO-ELEMENTS LIQUID BIO-STIMULANT FOR SOIL & FOLIAR APPLICATION

Product information:

An organic biostimulant which improves stress tolerance, increases nutrient efficiency, enhances root & vegetative biomass, & increases crop yields. ACTOSOL MICRO is formulated with humic acids which are biologically derived from natural organic humate deposits.

Directions and General Recommendations

Grains: 1 gallon per acre at planting followed by 1.5 gallons per acre. Fruits & Vegetables: 2.5 – 3 gallons per 40 - 60 gallons of water (transplant water) at planting followed by 1.5 gallons as a drench or foliar application 4 weeks later. Repeat application can be made at 1 gallon per acre at both prebloom and at initial fruit set.

Actosol's unique component is water soluble organic humic acid. Settling is natural, which confirms actosol contains humic acid; the beneficial organic matter. actosol easily resuspends upon shaking, mixing, and / or recirculation. If needed add water.

When using sprayers, remove line strainer & nozzle screen. For clog free spraying, use nozzles with 0.078 or 0.097 inch opening (TeeJet Flat Nozzle Spray Tip TP 8010, TP 8015, or equivalant)

SHAKE WELL BEFORE USE AND CONDUCT THE COMPATIBILITY TEST BEFORE MIXING WITH OTHER PRODUCTS.
