Precautionary Statement

Prevention: Observe good industrial hygiene practices.
 Product may stain cloth and equipment. Response: Wash hands after handling.
 Storage: Store away from incompatible materials.
 Storage of bulk products is best suited for original manufacturing containers.

Harmful if swallowed. Avoid skin contact. Causes eye and skin irritations. In case of contact, wash the affected areas with water immediately and continue washing for fifteen minutes. Seek medical attention if irritation persists.
 Disposal: Dispose of contents in accordance with local regulations.

CALCIUM SUPPLEMENTAL LIQUID FERTILIZER FOR SOIL AND FOLIAR APPLICATION

A concentrated readily available source of calcium for use as a preventative against calcium deficiency induced disorders. CALTRONE is designed as a foliar spray for trees, vegetables, cotton, tobacco and crops which require supplemental calcium. It may also be used as a soil-applied product.

Directions and General Recommendations

Foliar applications: Apply 1 pint—3 quarts per acre. Rates will depend upon the level of deficiency.
 Soil applications : Apply 1 quart—3 gallons per acre. Rates will depend upon the level of deficiency.
 When rates of over 1 quarts are required, split applications of 1 quart orless are recommended.
 Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general crop health and crop species. For best results, follow soil test or plant analysis recommendation.

Always jar test new combinations for compatibility prior to field mixing. NOTICE: Perform a phytotoxicity test on a small plot before large-scale application. To lower the risk of phytotoxicity, applications should be made early morning or late evening.
SHAKE WELL BEFORE USE

KEEP OUT OF REACH OF CHILDREN
