# Medical cabin

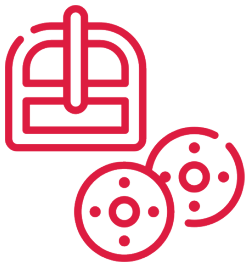

## Sound insulation

Specialized car sound and thermal insulation materials

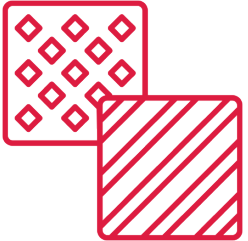

## Thermal insulation

Ceramic thermal insulation reduces thermal loss up to 30-40 % (anti-condensate and anti-corrosion properties)

### **Mounting**

Specially designed strong frame provides ruggedness of the construction for attaching medical equipment and ensures rigidity

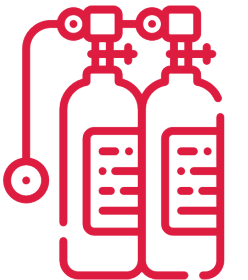

### **Interior**

Individually designed fiberglass plastic shields (ergonomics, leakproofness, easily cleaned with disinfectants)

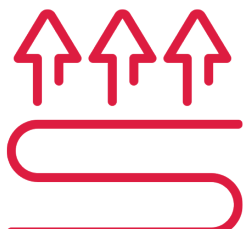

### **Light**

Multi-level lighting (on the ceiling, under the stretchers, on the floor), 7 modes (of brightness control) provides comfort for medical staff and patients

### **Oxygen**

Oxygen pipe (has triple protection) with two sockets and two oxygen 10 l cylinders with reducer and pressure gauge

### **Heating and conditioning**

Webasto/Eberspächer provides fast heating and cooling of the medical cabin

## **Medical equipment**

Stretcher

Stretcher support

Pick up stretcher

Vacuum mattress

Device for conveying a seated patient

Long spinal board

Carrying sheet

Vacuum splint

Cervical collar

Extrication device

Electric suction device

Pulse oximeter
