

## (R14) Case Study Players Club POA v2

Reduction of Organic Sediment Using Bio-Zyme EcoSocks

Five waterways were treated for 90 days with EcoSocks. Each lake had 4-6 sites measured. Organic sediment was reduced in all lakes. The monthly average reductions for the lakes are: Lake 15 (0.5 acre) (1.6cm), Lake 20 (0.3 acres) (.9 cm), Lake 21 (0.6 acres) (1.8 cm), Lake 22 (0.3 acres) (2.2 cm) and Lake 40 (0.8 acres) (2.7 cm). The averages for all lakes combined are 1.8 cm per month.
