

Addressing School Safety through S.T.R.E.N.G.T.H.

S

School Construction & Design

Being thoughtful in the building or remodeling of our schools using CPTED - Crime Prevention Through Environmental Design.

T

Technology Integration

Partnering with Police and Fire using technology to help monitor and respond to emergencies in *REAL TIME*.

R

Response to Emergency Plans

Review and revise operational plans to meet the needs of the district in 2024.

E

Early Identification of Threats or Problems

Provide additional ways students and staff can feel comfortable reporting suspicious behavior, addressing all threats comprehensively.

N

Notification and Communication Procedure

Use a flowchart to direct the sharing of information following the BOCAPS model: Below, Outside Agencies, Customers, Above, Peers, and Sections.

G

Growing Community Relationships

Safety is everyone's responsibility. Fostering quality community relationships can help school safety where gaps may exist.

T

Training and Drills

Updated Active Assailant Training, Stop the Bleed, Narcan deployment training, and drilling with public safety partners so everyone knows their role.

H

Hiring the Correct Staff

While safety is everyone's responsibility, it is the district's responsibility to have trained professionals capable of carrying out the safety plan.
