WHEN I SEE YOU

```
    D              A          G      A
Sometimes when I look around I don't understand the things you
  D *    D          A            G       A
do. I'm caught up in another world, I'm so very close..but far
      D *    D         A          G     A
from you. I'm living on the edge it seems of disparity, but how
          D *      D                   A
could I loose.  When all along you've been so good to me and
   G      A               D *
this life is full of the things you do.  (Chorus)
```

Chorus
```
  G                        D              C
Even when the cold wind blows, you are here with me.  When
                            D
the rain comes falling down and trouble moves the sea.  You're
G                     D                 C
in my darkest hour, You're in my brightest day.  There is
                             D              D*
something that I can learn when I see you every day.
```

```
     D          A       G   A             D*
A mother holds her baby so tenderly, her love shows through.  A
  D        A           G        A          D*
father's understanding heart will help his child know what to do.
       D                    A            G A
When I see these things I should understand that your plan is not
       D*       D          A        G      A
at the end.  When we forget your ways we can look to you and
          D*
start over again.  (Chorus)
```

```
     D                 A            G A
Sometimes You seem to be so far away, but our sight has been
   D*      D         A             G A
so blind.  We walk upon your holy ground but we pass you right
   D*            D          A
on by.  Well there's evidence in everything you've made and in
   G A          D*          D          A
every single thing you do.  From the smallest to the largest thing
     G      A        D*
when I stand still and think of You.  (Chorus)
