BUY CANADIAN

When we Buy Canadian not only are we supporting our economy by helping Canadian manufacturers and farmers, there are other benefits as well, including:

Creating and giving jobs back to Canadians, thus keeping our dollars at home. Independent Canadian businesses provide 77% of all private jobs in Canada.

Quality control. Canadian manufacturers are highly regarded for their strict quality control standards. "Made in Canada" has earned its reputation of being high quality and durable.

Direct communication. The barriers that once existed between Canadian manufacturer and consumer are diminishing and it has never been easier to directly communicate with the manufacturer to have any questions or requests answered.

Better for the environment. Products from Canada produce **less carbon footprint** for you to receive the goods, which is a tremendous aide to the environment.

Not only are there no tariffs, there also are no duty or brokerage fees paid to bring the product into the country, which would be added to the cost of the product and therefore potentially making the product more expensive than its Canadian-made equivalent.

Health and safety are carefully regulated in Canada. We can feel good about buying products made in Canada.

Support for our communities. When we buy Canadian, we are contributing to the enrichment of our communities and could be contributing to the survival of a struggling local family business.

For a list of products and services made in Canada visit

<https://madeinca.ca>

(Made in CA is an independently compiled list of Canadian products in one place, so you can support Canadian businesses and Canadian workers.)
