“Village in the Air”  
Crafting & Fun  
Thursday, April 16, 2026

**Village in the Air** is a fun and imaginative art project designed to inspire kids to think creatively and build their own tiny world above the ground. Using birdhouses as miniature homes and wooden sticks as supports, children create a floating village in the sky. They can paint the houses in bright colors, add windows and doors, design little bridges, and even invent stories about the people or creatures who live there. This hands-on project encourages creativity, problem-solving, and teamwork while allowing each child to express their unique ideas. *Village in the Air* turns simple materials into a magical sky-high community full of imagination and wonder.
