June 2004 to July 2016 Partner / CTO Brevan Howard.

CTO/Partner and member of the Partnership from 2007-2016. Brevan Howard grew from assets of \$870m in April 2003 to become one of the largest and most successful hedge funds in Europe with AUM over \$40bn by 2013 including a significant average return since inception in its flagship fund.

As Chief Technology Officer, I built a team of over 100 experts from NASA scientists to technology specialists for development and valuation across all assets. This covered front, middle and back-office areas and included 200+ specialist and successful trading analysis and trade finder tools. With consistent and accurate real-time P&L and RISK we adapted quickly and traded profitability during extreme events such as the 2008 financial crisis. Entrepreneurial role building new businesses across all assets.

I originally joined as Head of Quantitative Development, a new group to draw together the analysis of the Quant group with robust spreadsheet and database tools. These sheets were successful, and I was given responsibility for all Technology in 2008. Groups included Networks, Wintel, Murex, Desktop, Production Control, Database, and Cyber Security across 10 datacentres worldwide.

June 1994 to June 2004 Director, Fixed Income Research, Citigroup.

Developed a scripting language for Fixed Income which was used in a suite of tools for Sales and Trading. UNIX, C, Sybase developer tools. I originally joined Salomon Brothers as a Quantitative Developer and created a portable C library which could be compiled into many applications giving them a spreadsheet like functionality.

January 1992 to June 1994 Accenture.

Equity trading prototype system for the London Stock Exchange 1992

New Repo trading system for Fixed Income in New York and London for Goldman Sachs 1993-4.

July 2016 to Present

Career Break spent several years renovating properties and lived outside London in rural Kent.
