

Construction Supervisor

Job Summary

A McQueen Construction Supervisor oversees all day-to-day activities on McQueen job sites, working in tandem with Construction Managers to facilitate efficient construction operations. This individual completes necessary hands-on carpentry tasks while overseeing construction activities when the CM is not on site. CS's maintain a consistent line of communication between CM's, subcontractors, and clients to ensure delivery of an exceptional product.

Responsibilities

- Supervise each stage of construction for assigned projects
- Give clear and concise directions to field team and subcontractors to set them up for success
- Demonstrate knowledge of tools and techniques used to create/install doors, windows, cabinets, stairs, and other fixtures
- Maintain consistent line of communication between CM's, subs, and McQueen field team
- Utilize organization skills to keep track of numerous project details, ensuring a smooth construction process
- Understand and execute scope of work for assigned projects
- Demonstrate ability to interact and communicate clearly and professionally with customers
- Complete all other duties as assigned

Qualifications

- Proficiency in construction management software
- 3+ years of relevant experience
- Excellent communication, professional appearance, and teamwork skills
- Ability to read and interpret schematics and construction plans effectively
- Capability to manage multiple projects simultaneously while maintaining attention to detail

We offer a comprehensive, industry-leading benefits package including health/dental/vision insurance, 401k with company match, disability and life insurance, vehicle allowance, PTO, and paid holidays
