

SPEAKER BIO

Mike Levy, CIA, CRMA, CISSP, CISA, CDPSE, MBA
Chief Executive Officer, Cherry Hill Advisory

Mike Levy is the founder and CEO of Cherry Hill Advisory, an internal audit, risk, and assurance firm that helps public and pre-IPO companies build programs that keep pace with the business. Much of the firm's work today is driven by the questions audit and risk leaders are bringing to Cherry Hill: how to put AI to work in the audit function, how to get ahead of cybersecurity and emerging technology risk, and how to strengthen assurance without slowing the business down. The firm's services span co-sourced internal audit, enterprise risk management, fraud risk, AI and cyber risk, and External Quality Assessments.

Mike brings a practitioner's perspective to that work. Before founding Cherry Hill Advisory, he held Chief Audit Executive roles across public and private organizations and built his foundation in audit and risk at a Big Four firm.

Mike is a contributing author of *Sawyer's Internal Auditing*, serves on the IIA's International Standards Board, and is a past chair of the IIA's North American Board. This year, he was named as a recipient of the IIA's Global Volunteer Leadership Award.
