

ABOUT THE

# Moravian Star

For many years, the Moravian Star has been a favorite decoration appropriate for the Advent and Christmas Seasons, the first having been made in the Moravian settlement of Niesky, Germany around 1850. Today, these stars shine in homes, schools, and churches in many parts of the world.

The Moravian Star is a reminder of the star that led the Wise Men from their home in the distant east to Bethlehem, where they presented gifts to the Christ Child. It also symbolizes the Christ Child himself, of whom the Old Testament prophesied, "A star shall come out of Jacob" (Numbers 24:17). The Risen Christ, likewise, proclaimed himself as "the root and offspring of David, and the bright and morning star" (Revelation 22:16).

It is appropriately displayed from the First Sunday in Advent (the fourth Sunday before Christmas) until the Festival of Epiphany (January 6th).

## CAUTION

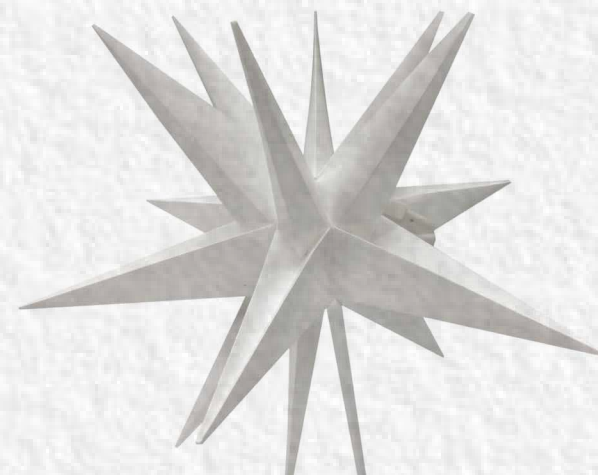

- Only use an LED bulb with Moravian Star.
- As with most electrical appliances, electrical parts in this star are electrically live. Please use caution.
- Minimize exposure to water. Be aware of sharp points. Keep out of reach of children.
- If hanging star unsupported from overhead socket, it may be necessary to secure the fixture with heavy twine to prevent weight of the star from pulling the plug from the socket.
- 12" Folding Star Bulb : G40 LED 0.7W, warm white color bulb.

## Moravian Star

ADVENT & CHRISTMAS

### PARTS LIST

- A - Star unit, Inside hatch for light bulb
- B - Light bulb socket, Outlet plug
- C - Socket protector (optional)
- D - Bulb
- E - Fastener

# INSTRUCTIONS

**STEP 1** Loop light bulb socket (B) under bracket (A) with the cord side of the socket facing towards the inside of the bracket. Rest socket in divet located inside the star unit (A). Place socket protector (C) on top of the light bulb socket.

**STEP 2** Screw in light bulb (D) into the light bulb socket, and lay flat in the inside of the star unit.

**STEP 3** Swing handle 1 and handle 2 located inside star unit (A), out and around until they are touching. Once the two handles have met, release the clasp located on the outside of the handle on star unit (A) and use clasp to pinch & connect together the two sides.
