SCHOOL VIOLENCE

Public safety call-takers and dispatchers increasingly deal with reports of violence in school settings. This course explores communications techniques, identification of resources, and strategies related to violent campus events, from threat assessment and pre-attack behaviors to resource coordination and field response.

Anthony Alvo
VP of Operations, Kim Turner, LLC
POST-certified instructor and USMC veteran. Over two decades in law enforcement, 9-1-1 dispatch, and public safety education.

Cpl. Ken Hardesty (Ret.)
Police Corporal (Ret.)
25 years in law enforcement (retired). POST Advanced Certificate. Expert in use of force, active shooter, de-escalation, and peer support.

WHAT YOU WILL LEARN

01 Threat Assessment & Warning Signs

Learn structured professional judgment for campus threats and pre-attack behaviors including leakage, weapons interest and acquisition, fascination with prior mass attacks, pseudo-commando behavior, legacy tokens, violence against family members, and other precipitating events that signal escalation.

02 Prevention & Resource Planning

Develop prevention strategies across dispatch centers, field units, school districts, and parents. Identify public safety, private, and allied agency resources for coordinated response. Understand school violence threat assessment models, media considerations, and potential preventative measures for campuses.

03 Communications & Dispatcher's Role

Review communications techniques for active campus violence events, resource identification, EMS and fire coordination, hospital trauma level awareness, and the critical role dispatchers play in officer safety, specialized team deployment, and coordinated field response across multiple agencies.
