

Valve Wrenches

Valve wrenches provide an easy and convenient way of opening and closing valves

Six styles are available...

Style No. 1 to No. 5 are electro-zinc plated to prevent corrosion. Style No. 6 is painted.

- Style #1** Fits 2" to 5" orchard valves
Handle is 30" long. The flange on the bottom is used to raise and lower the distributing gate slide in a pot.
- Style #2** Fits the same valves as No.1
Handle is 15" long and has a belt clip for ease in carrying.
- Style #3** Fits 3½" to 5 " orchard valves which have a square head on the screw. Handle is 30" long and the flange on the bottom is used to raise and lower a distributing gate slide.
- Style #4** Fits orchard and alfalfa valves up through 14"
Handle is 30" long. Longer handles are available at slight extra cost.
- Style #5** Fits 14" and 16" and larger valves which have a large square head on the screw. Handle is 30" long. This wrench may be attached permanently to the valves. Longer handles available at slight extra cost.
- Style #6** Fits 2" square nut head on valves. Handle is 50" long and 28" across.
