

KR SERIES UP TO 4 ACRES

The Keeton Industries KR series of lake bed aeration systems are the ideal choice for ponds and lakes up to 5 surface acres in size. The KR series superior design is unmatched in energy efficiency, effectiveness and sound reduction. These systems feature 1/2HP Gast Rocking Piston compressors, high volume cooling blowers, programmable digital timers and fully adjustable aluminum manifolds housed in attractive, 100% recycled plastic cabinets. The KR series can operate up to 4 selfcleaning, non-clogging Duraplate™ membrane diffusers. Duraplate diffusers emit millions of tiny bubbles that increase dissolved oxygen levels while eliminating stratification, improving water quality and clarity. Like all of our aeration systems, the KR series are backed by a full 2 year warranty.
