

C Dune HD Configuration Guide

Before you start, make sure your first DVD / Blu-ray has already been archived successfully

Do not proceed below UNLESS a disc has been archived first.

1. Connect the Dune HD Media Player to the HDTV, & power it on. Make sure **SOURCES** Is selected. (Shown on right)

2. Press **DOWN** on the remote to highlight Network Browser.

Then, press **POP UP MENU** on the remote to bring up the menu as shown.

Select **New Network Folder**.

3. In this new pop-up, enter in the following information using the handheld remote, or via a USB keyboard.
Capitalization DOES NOT matter.

Name: **movies**

Type: **SMB**

Server: **(Your Server Name Here – See sticker!)**

Folder: **movies**

User: **owner**

Password: **123456**

4. You will now see a new **Movies** icon appear.
Highlight and select it.

5. You'll now see the "Network Browser" screen for the LiivNAS, as shown on right.

Highlight **My Movies**, and click on the POP-UP MENU button on the remote.

6. A new pop-up screen will appear. Select the first option: **Add to Favorites**.

A confirmation prompt will appear, as shown below.

7. Go to the **Favorites** area on top. You'll now see a new item – **My Movies** – with a star logo.

Select **My Movies** to start browsing your collection!

8. Welcome to the My Movies screen!

You can now browse for movies by title, categories, release date, genre, and much more – enjoy!
