How to upgrade Player's software to play UHD movies.

Older version than 8.9 will not play UHD movies from Movie folder. You have to upgrade your software to Version 8.90.005.

1. On main screen go to System and LibreELEC tab.
2. Open Tab and go to System and Updates.
3. Change Automatic Updates to "manual".
4. Go to "Update channel" and choose "LibreELEC-9.0"
5. Go to "Available Versions" and choose 8.90.005. (Newer versions are not compatible with "Confluence" skin.)
6. Go back to main screen (Home) and go to System>System>Display and choose refresh rate 24Hz.
7. Go back to main screen, go to movies and click on UHD Movie. It should play your movie.

If your version doesn't have LibreELEC tab:

1. Go to System>Interface>Skin.
2. Change Skin to "Estuary", accept it and go back.
3. Stay on System and go to LibreELEC folder.
4. Go to System and Updates.
5. Change Automatic Updates to "manual".
6. Go to "Update channel" and choose "LibreELEC-9.0"
7. Go to "Available Versions" and choose 8.90.005. (Newer versions are not compatible with "Confluence" skin.)
8. Go back and go to Interface>Skin.
9. Change Skin to "Confluence", accept it and go back to Home screen. (After upgrade you should see LibreELEC tab.)
10. Go System>System>Display and choose refresh rate 24Hz.
11. Go back to main screen, go to movies and click on UHD Movie. It should play your movie.
