

How to add transferred movies to Collection Management

Sometimes you may have to add movies from old server or external HDD to your Media Server. Because you are bypassing processing by AnyDVD HD, and Drop-n-Rip, you have to manually add movies to Collection Management.

After you have all movies in Movie folder, open Collection Management.

The screenshot shows the 'Drop-n-Rip Archiving - Collection Management' window. The left sidebar lists various movie titles, with '11 Minut' selected. The main area displays the 'General Profile Data' for this movie, including barcode, local/original titles, cover type (Jewel Case), media type (Movie), production year (2015), runtime (81), disc release date (9/18/2015), parental rating (Unrated), format (PAL), and a detailed description. The description reads: 'A jealous husband out of control, his sexy actress wife, a sleazy Hollywood director, a reckless drug messenger, a disoriented young woman, an ex-con hot dog vendor, a troubled student on a mysterious mission, a high-rise window cleaner on an illicit break, an elderly sketch artist, a hectic paramedics team and a group of hungry nuns. A cross-section of contemporary urbanites whose lives and loves intertwine. They live in an unsure world where anything could happen at any time. An unexpected chain of events can seal many fates in a mere 11 minutes. Written by 72nd Venice International Film Festival.'

On the right side, there are two sections: 'Actors' and 'Crew Members'. The 'Actors' section lists names and roles, such as Richard Dörner as Director, Paulina Chmurska as Anna Hellman, and Jerzy Skolimowski as Director. The 'Crew Members' section lists Jerzy Skolimowski as Director and Jerzy Skolimowski as Writer. Below these lists are buttons for 'Edit Actors', 'Edit Crew', and 'Inherit Cast & Crew from Movie'. There are also buttons for 'Select Front Cover' and 'Select Back Cover' next to movie posters for '11 Minut'.

At the bottom of the window, a status bar shows: 'Editing '11 Minut'. Disc Titles: 967 | Movies: 0 (703) | TV Series: 0 (7) | TV Episodes: 0 (6) | Actors: 54587 | Directors: 999'.

Go to File>Import>Folder content.

Use data in english in situations where data could not be found for the specified language.

If your titles are located on storage, such as local harddrives or one or more servers on your network, you can let Drop-n-Rip(tm) Archiving add your titles automatically by importing titles from the folders.

Drop-n-Rip(tm) Archiving will detect the titles in your folders using different identification methods depending on the media type. Be aware that depending on the identification method, there can be incorrect matches, which you can manually correct after the import.

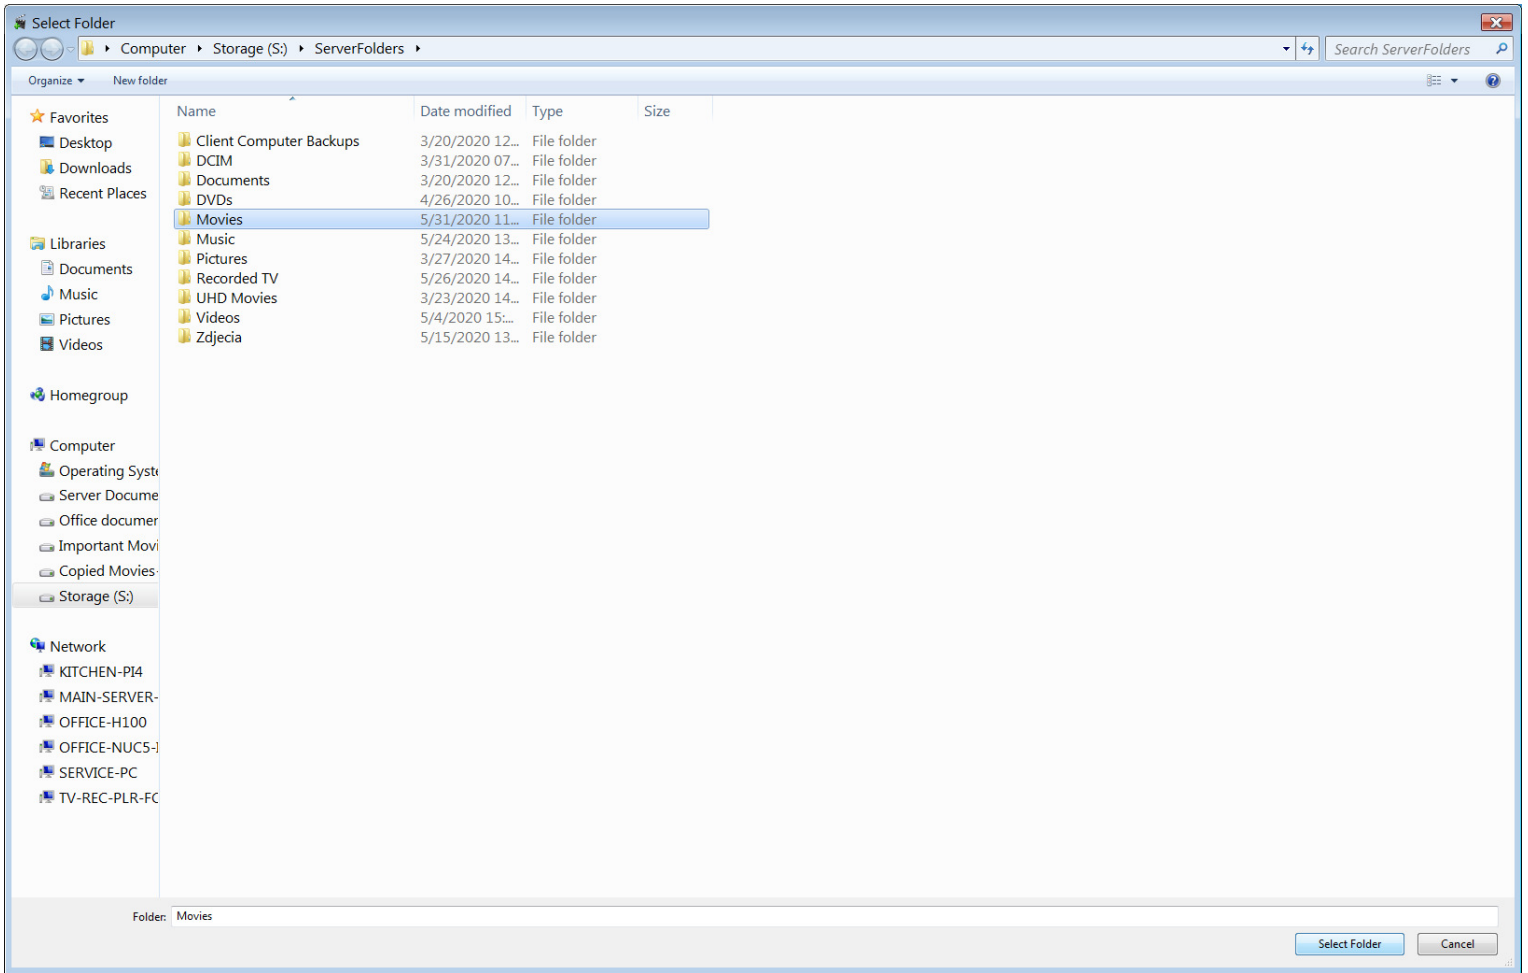

Please select the folder to import from, which must be the folder above your individual movie folders, and select the content type of the folder you would to import. Please also select which country for which you would like data received.

Notice! Drop-n-Rip(tm) Archiving requires your movies to be located in individual folders - one movie per folder. If you have your titles located with multiple movies in the same folder, it is recommended that you move them to individual folders.
