

## Hello Ontario's finest Midrise Multi-residential builders and designers

**Pain:** facade options are limited for EIFS, Hardie, metal siding. That's it. How does anyone differentiate their building with those choices? Weak surfaces, UV induced fading, poor installation leading to maintenance costs even before end of warranties are all costly. Let alone law suits.

**Solution:** CERACLAD Rain Screen Exterior Siding System provides 20 year UV warranty to Finish Warranty including colour fade, 50 year product warranty, maintenance free change to minimal maintenance. As it's a system, with clips, tops and bottoms of walls, preformed corners, quality comes at no extra charge.

**Affordable prices:** manufacturing processes and standard form, easy 'kit' installation makes a very affordable choice. The System = Quality.

**Aesthetic choices** - we have that too. 8 Styles, many standard and custom colours. No extra price for lasting beauty.

**Problem solved**
