Creative Freedom – That Lasts

For more than 30 years, CERACLAD has provided architects and developers the materials they need to create the world's most beautiful and well-protected buildings. With 8 styles and nearly unlimited color choices, CERACLAD gives you the design options you want to allow your imagination to run free, and the technology you need to ensure your creations will stand the test of time. With our proprietary Rainscreen system, structures built with CERACLAD have exterior walls that are resistant to mold and dry rot and are lower maintenance, with a beautiful finish that lasts for years to come. ■ Look through this portfolio of projects to see the many colorful ways designers have taken advantage of the options provided by CERACLAD to build stunning expressions of the freedom to create.

Application: Horizontal

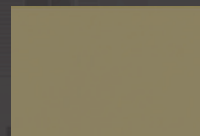

Contemporary Smooth
Colors used: Midnight Blue
Application: Horizontal

PROJECT: Medical Center – Everett, WA

Products used:

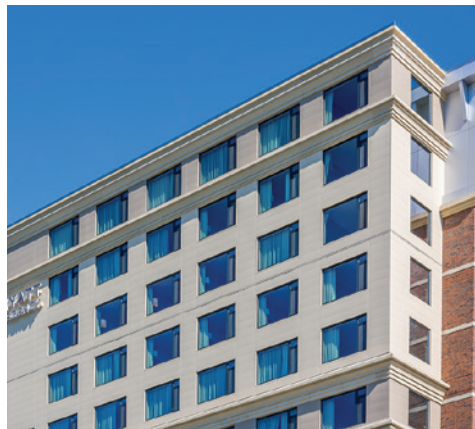

Contemporary Smooth
Colors used: Wasabi
Application: Horizontal

“Re-cladding with CERACLAD not only elevates the property value with its aesthetic improvements, but results in big savings for the owners because it requires very little maintenance.”

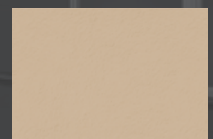

PROJECT: Luxury Hotel – Renton, WA

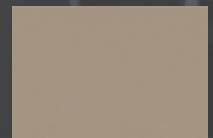

The high quality and durability of the CERACLAD siding system will produce long-term cost savings for the owner.

Products used:

Contemporary Smooth
Colors used: Wheat
Application: Horizontal

Contemporary Smooth
Colors used: Brass
Application: Horizontal

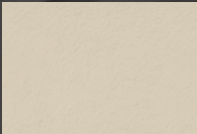

"We chose CERACLAD because it's made from recycled materials, has a factory applied ceramic-based finish, and can easily handle the strong winds and intense sun exposure."

PROJECT: Multi-Family Residential Building – Seattle, WA

Products used:

Contemporary Smooth
Colors used: Linen
Application: Horizontal

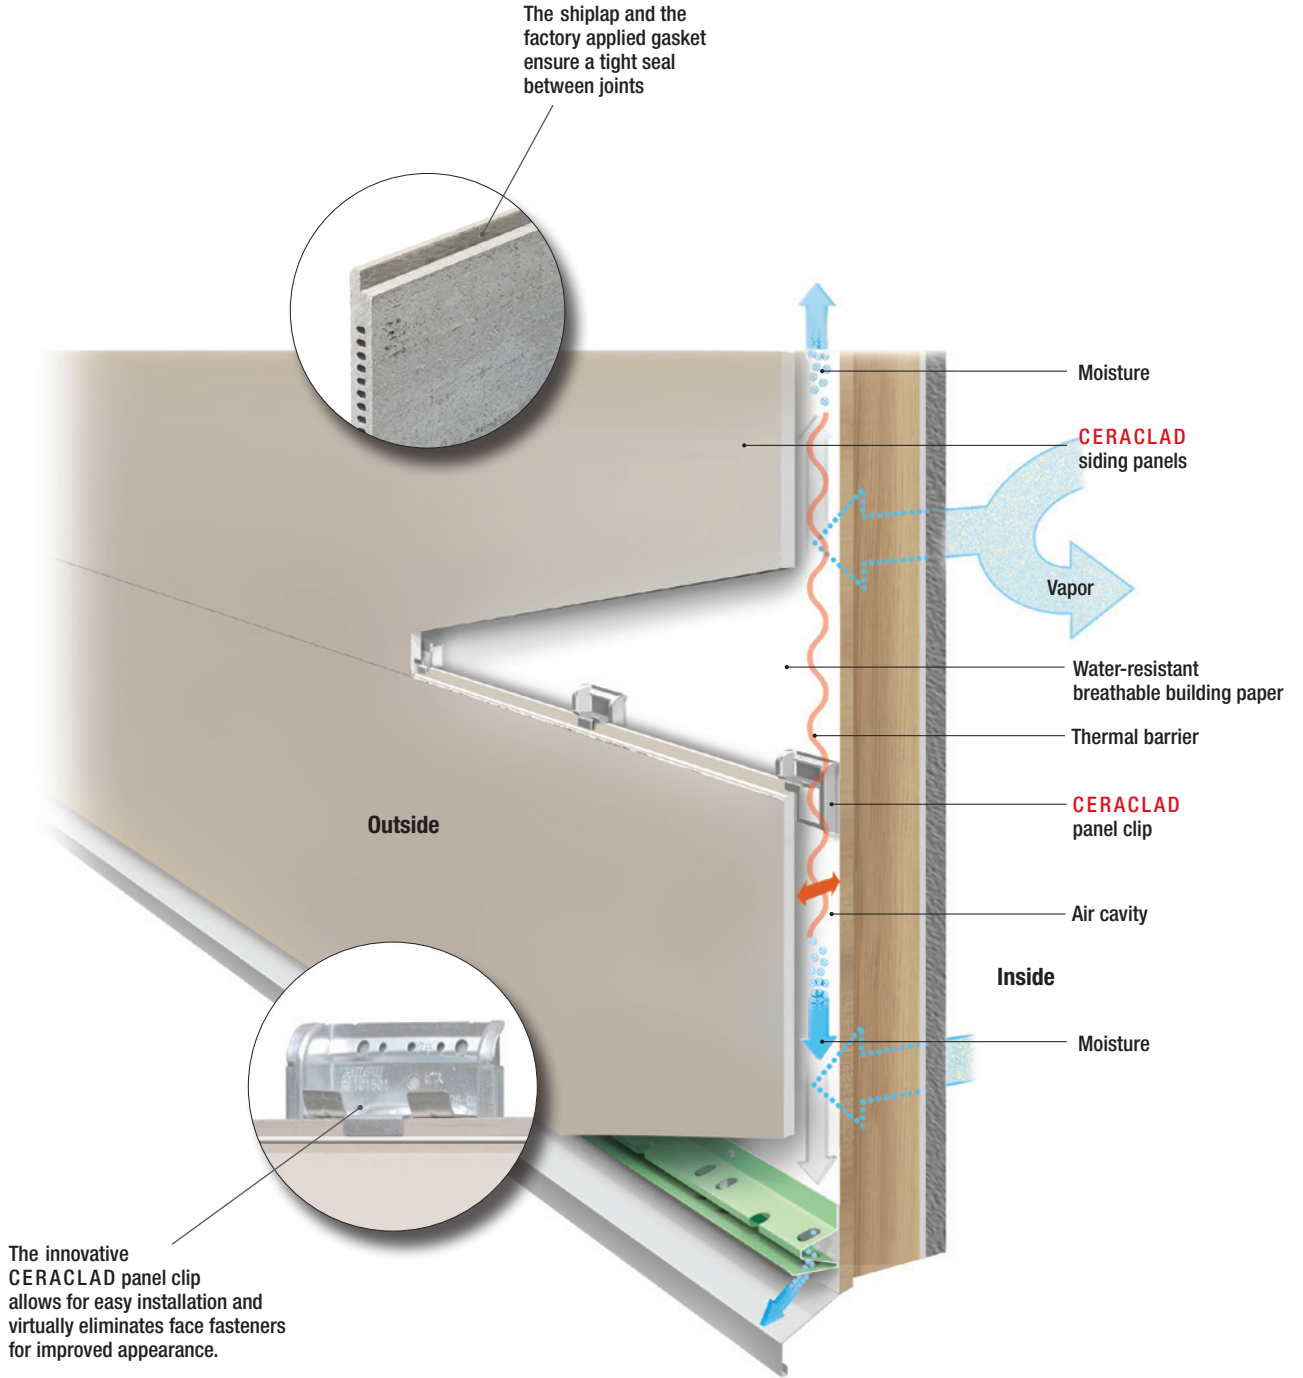

Contemporary Smooth
Colors used : Slate
Application : Horizontal

Protects from the outside – and from the inside

The CERACLAD system incorporates a ventilation layer in the exterior wall structure, allowing moisture to escape from within walls, which helps prevent mold, health problems and dry-rot in walls. Should any rainwater find its way past the exterior siding panel, the ventilation layer discharges the moisture outside. That same ventilation layer helps guide humid air from inside to the outside, preventing condensation from forming on the sheathing. The end result is a high performance vented wall assembly that provides structures with long-term protection against water infiltration, and low maintenance wall surfaces with a long lasting, beautiful appearance. Buildings using the CERACLAD Rainscreen Exterior Siding System are more energy efficient, and sustainable, have fewer maintenance problems and provide a healthier living environment for their occupants.

CERACLAD offers a broad palette of colors, rich textures and unique appearance, all backed with a 50 Year Limited Warranty and a 20 Year Limited Color Warranty for pre-finished ceramic coated panels, and a 15 Year Limited Finish Warranty for CREATIV™ custom color panels.

The heat-resistant, UV-blocking ceramic coated finish on CERACLAD siding repels moisture, provides a high performance surface that resists fading and discoloration, reduces maintenance costs for repainting and increases the value of the building.

PROJECT: Private Home – Japan

Our customers tell us they like the texture created by pouring concrete into a wooden frame. This texture gives our Board Formed Concrete panels a softer and warmer look.

Products used:

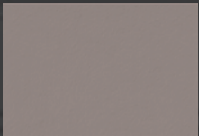

Board Formed Concrete
Colors used: Concrete Gray
Application: Horizontal

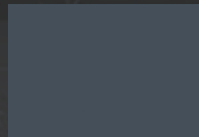

PROJECT: Multi-Family Residential Building – Redmond, WA

Products used:

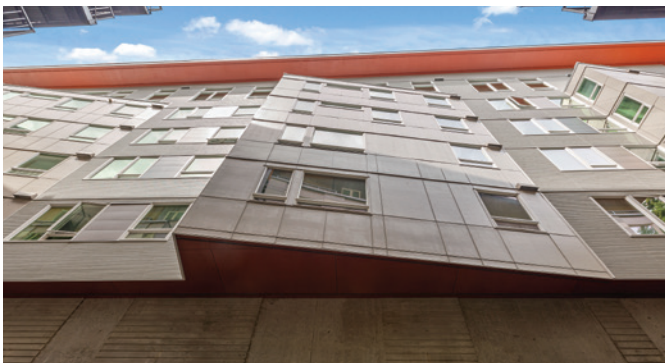

Contemporary Smooth
Colors used: Medium Gray
Application: Horizontal

Contemporary Smooth
Colors used: Midnight Blue
Application: Horizontal

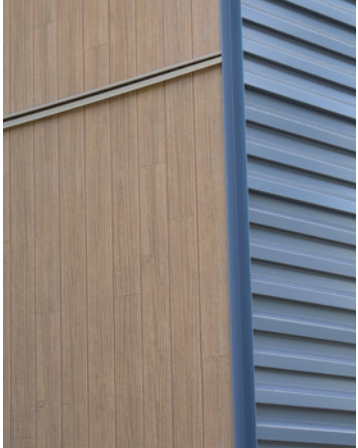

Cast Stripe
Colors used: Ash
Application: Horizontal

Funds that would have been allocated to painting and replacing the siding can now be spent on other areas.

PROJECT: Elementary School – Monroe, WA

Products used:

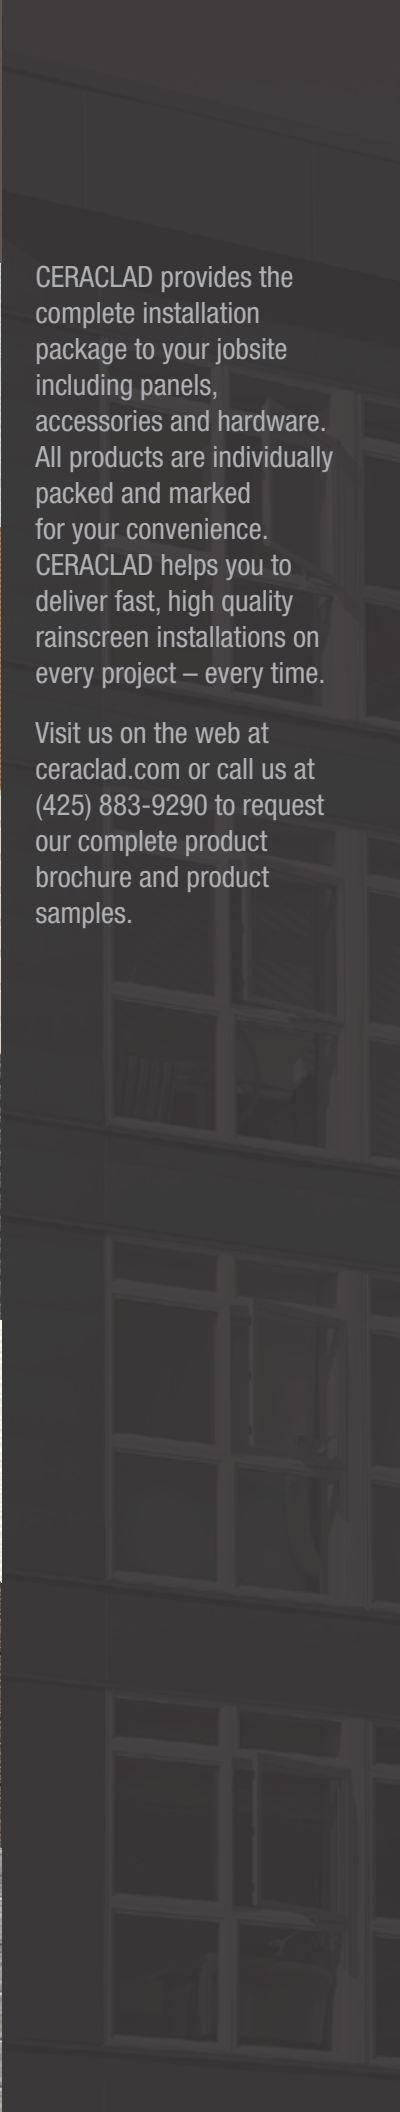

Rustic Wood
Colors used: Caramel
Application: Vertical
