Stop Fumbling with Tight Spaces. Pull Hydraulic Lines with Ease!

The ultimate solution engineered specifically to aid in the fast, hassle-free removal and installation of hydraulic lines. When space is tight and access is limited, EZ PULL HYD guides your lines smoothly into place every single time.

Why Mechanics & Operators Choose EZ PULL HYD:

- **Save Time:** Dramatically reduces the frustration and hours spent wrestling lines through cramped engine bays and heavy machinery frames.
- **Protect Components:** Prevents snagging, kinking, and costly damage to delicate hose threads during routing.
- **Heavy-Duty Build:** Engineered for rugged, everyday workshop and field environments.

THREAD CONFIGURATIONS	INCLUDED HOSE FITTING SIZES
• O-Ring Face Seal (ORFS) • JIC (Joint Industry Council)	• -4 • -6 • -8

Complete 6-Piece Kits Available

Simple 3-Step Operation:

- 1. Thread** the EZ PULL HYD fitting securely onto your hydraulic line.
- 2. Attach** your pull cord or wire to the integrated bullet-nose eyelet.
- 3. Pull** smoothly through the tightest channels and reinstall with ease. Simple 3-Step Operation:
