

## **Sustainability – Science Based Targets Initiative**

As part of our commitment to sustainability and environmental responsibility, we are actively working to measure, reduce, and offset our carbon footprint.

Our approach includes improving energy efficiency, transitioning to renewable energy sources, minimizing waste, and engaging suppliers and stakeholders in climate-conscious practices. We are also committed to transparent reporting and continuous improvement in line with international standards such as the Science Based Targets initiative.

As part of this commitment, our estimated emissions in the prior year are as follows:

0.216 kgCO₂e / \$	
0.011 kgCO₂e / \$	5.1%
0.009 kgCO₂e / \$	4.0%
0.197 kgCO₂e / \$	91.0%
	0.009 kgCO₂e / \$

0.0461.00 /6

At present, through participation in the Clean Energy Alliance, 75% of our purchased energy is currently from clean power sources and our facilities have converted to LED lighting throughout. Furthermore, Pacific Lasertec has committed to reduce Scope 1 & 2 emissions by 37.8% from a base year of 2020 by 2029.

Reducing carbon emissions is not just an environmental imperative — it is a responsibility we share in shaping a more sustainable future for generations to come.

Sincerely,

Lynn Strickland Executive Vice President, Chief Commercial Officer
