## ***A Prison Anthology, Brushy Mountain to Morgan County (book 2)***

This second installment in the *Anthology* series picks up the chronicle of *Mountain Review* two years before the closing of the historical facility and marches you straight into the aftermath:

The old-school guard from East Tennessee's most infamous prison was about to migrate across the mountain to the newly-constructed Morgan County Correctional Complex and clash with gang-bangers from the west. Complicated by a hostile administration in Nashville, MCCX employees and prisoner staff alike found themselves caught in a power struggle by invading forces on every side. The end result changed Tennessee corrections forever.

This *Anthology* takes you inside the gate and gives you a perspective the outside media never had: 190 pages
