

February 2022

Phase II of the 3 Wells Project – Progress Update

The Meridian Metropolitan District would like to provide an update to homeowners on the construction of the 3 Wells Project adjacent to the Pool Park. This phase includes the installation of pumps, pipes and a control vault. This is the infrastructure needed to connect the wells to the raw water conveyance system.

The fall weather we experienced allowed for the construction team to make good progress on the piping and the control vault is currently being constructed. The project has encountered a delay in regard to upgrading and moving the electrical transformers. As a result, the project completion is expected in mid-May 2022.

Construction activities will continue to take place Monday through Friday during daylight hours. There will be very limited weekend work, and no work will occur on holidays.

Should you have any question, please contact the District at 303-790-0345 or online at www.meridiandistrict.com.

Thank you for your cooperation and patience as this project is completed. We greatly appreciate it and are trying to move the project along as quickly as possible.

Sincerely,

Meridian Metropolitan District
