

Mosquito and Tick Spray Prep Sheet

Treatment remains effective for 3-6 weeks, dependent on rainfall.

(no guarantees or retreats on mosquito or tick treatments)

PEOPLE AND PETS need to be inside during treatment and stay off treated area for 1 hour until spray has fully dried.

Preparation to be done by customer before service:

- * All outdoor toys, play equipment, grills, bird feeders ect. must either be covered or removed.
- * Empty all birdbaths and pet dishes
- * Close all windows to your home and any vehicles outside
- * Turn off window air conditioning units, central air units are ok to remain on.
- * **ALL CHICKENS MUST BE IN THEIR COOP.** This includes any neighbors that may have free range chickens.
- * People and pets need to stay off treated area for 1 hour or until spray has fully dried.

Slater Pest Management will reschedule appointment with customer if it is raining or high wind conditions.

****\$75 fee for cancellations without 24-hour notice or un-prepared areas may be applied.**
