## **AISO PLASTICS CC. CABLE TIE MANUFACTURERS**

### **PEACE BE ONTO YOU**

#### **Our history**

**We started as a family retail business that existed since early 1900's**

**In 1983 we started plastic injection moulding of aerosol dust covers as  
Adia Brothers in Boksburg Gauteng.**

**Then in 1990 we moved to Apex in Benoni where we traded as  
Adia Bros Polymer Engineering CC. With the continued commitment to customer  
service we gained experience in high speed production of packaging products**

**After merging into more packaging lines for the spice market in 2006,  
We changed our trading name to Aiso Plastics CC.**

**In January 2013 we began the manufacture of nylon cable ties.  
With this venture we hope to bring customer satisfaction to the electrical,  
plumbing, household and industrial sectors of the world market through  
stringent quality control and excellent customer service.**

#### **Our Vision**

**Our vision is to become the supplier of choice in the supply of cable ties and  
related fastening seals. At the same time we wish to remain a completely South  
African company.**

**We also welcome end-users to contact us directly for their cable tie needs.**

**The company is wholly private BEE compliant and proudly South African.**
