

PSE&G-Sponsored On-the-Job Training Program

Build your career.
**Brighten New Jersey's
future.**
Earn while you learn.

- Receive paid, hands-on, and job-specific training with a dedicated mentor at an energy efficiency company
- Gain experience, do meaningful work, and build in-demand skills in New Jersey's rapidly growing clean energy industry
- Get access to a multidisciplinary training curriculum that provides clean energy, technical, interpersonal, and life skills

**Clean
Energy
Jobs
Program**

The Clean Energy Jobs Program, a collaboration between PSE&G, the New Jersey Department of Labor and Workforce Development, and local partner organizations, provides training and resources to prepare participants for careers in New Jersey's fast-growing energy efficiency sector. PSE&G is the sponsor of the Clean Energy Jobs Program and its On-the-Job Training Program. Training and career placement will only occur through the program's partner suppliers—not with PSE&G.

Apply now to be a **Heating, Ventilation, and Air Conditioning (HVAC) Technician Trainee**

Prior experience in the clean energy industry is *not required*.

Employer: A participating company specializing in energy efficiency; jobs and training not with PSE&G

Location: Travel within territory (a valid driver's license is required)

Starting salary: \$22.50 per hour

Duration: 16 weeks

Job placement will be determined following successful completion of the 16-week PSE&G-sponsored On-the-Job Training Program.

Read on for details.

PSE&G-Sponsored On-the-Job Training Program: HVAC Technician Trainee

Now is an exciting time to join a fast-growing industry and help create a more sustainable New Jersey. This opportunity is specifically designed for individuals who are not yet experienced in the clean energy sector.

Work You Believe In

Job and Program Responsibilities

A day in the life of an HVAC Technician Trainee includes diagnosing and repairing HVAC systems, and helping customers make informed decisions by:

- Executing technical ventilation work to the highest standards
- Providing a high level of professionalism for all services performed
- Solving problems that may arise during customer appointments, and communicating potential issues to a supervisor

A successful HVAC Technician Trainee also will be able to demonstrate:

- Excellent communication skills; after training, ability to explain technical information in basic terms; positive, can-do attitude; professional presentation; teamwork
- Organizational skills, including keeping company truck clean and stocked; punctuality and good time management
- Motivation to perform quality work
- Participation in continuous training, and willingness to obtain licenses and certifications to advance in a career as a technician

Qualifications

- Must be able to work on your feet for extended periods (reaching overhead, bending, squatting, crawling, kneeling). Ability to lift, push, pull, carry, or use hand trucks to move heavy equipment is required
- Ability and willingness to move and climb ladders and work on roofs and in enclosed spaces, such as attics and crawlspaces, that may result in exposure to extreme temperatures, low lighting levels, odors, dust, contaminants, and other potential hazards
- Valid driver's license to travel between customer locations and warehouse in a company truck is required
