Job placement will be determined following successful completion of the 16-week PSE&G-sponsored On-the-Job Training Program.

Clean Energy Jobs Program

Launch your career. Gain skills that set you apart. Earn while you learn.

- Receive paid, hands-on, and job-specific training with a dedicated mentor at an energy efficiency company
- Gain experience, do meaningful work, and build in-demand skills in New Jersey's rapidly growing clean energy industry
- Get access to a multidisciplinary training curriculum that provides clean energy, technical, interpersonal, and life skills
- Earn valuable credentials for real-world application: BSP, EPA 608, OSHA 30
- Learn directly from industry professionals in a safe, structured setting

Read on for details.

PSE&G

The Clean Energy Jobs Program provides training, access to work opportunities, and other resources to prepare participants for careers in New Jersey's fast-growing energy efficiency sector. PSE&G is the sponsor of the Clean Energy Jobs Program and its On-the-Job Training Program. Training and career placement will only occur through the program's partner suppliers—not with PSE&G.

On-the-Job Training Program: Weatherization Technician Trainee

Now is an exciting time to join a fast-growing industry and help create a more sustainable New Jersey. This opportunity is specifically designed for New Jersey residents who are interested in launching a career in the clean energy sector. Prior experience in clean energy is *not required*.

Job and Program Responsibilities

A day in the life of a Weatherization Technician Trainee includes helping homeowners achieve improved comfort, indoor air quality, and energy efficiency by:

- Performing ventilation, air sealing, insulation work, and other improvement activities, such as light electrical and carpentry upgrades
- Executing work to the highest standards and providing a high level of customer service
- Solving problems that may arise during customer appointments, and communicating issues to a supervisor
- Maintaining a flexible schedule to accommodate travel between customer locations and the company warehouse

> **"I'm proud to be a part of clean energy in New Jersey. In addition to industry knowledge, the Clean Energy Jobs Program training has provided me with valuable transferable skills."**
>
> —Gwendolyn Small; hired by Encore Lighting after completing the PSE&G-sponsored On-the-Job Training Program

A successful Weatherization Technician Trainee will be able to demonstrate:

- Excellent communication skills; after training, ability to explain technical information in basic terms
- Motivation to perform quality work and build a career as a technician
- A positive, can-do attitude; professional presentation; teamwork
- Successful completion of all training

Qualifications

- High school diploma or equivalent
- Must be comfortable working in attics and crawl spaces
- Must maintain a valid driver's license and reliable transportation for traveling to work and job sites for the duration of the program
