

CLINICAL APPLICATIONS

Apex BG+ is engineered for consistent bone regeneration.

APEX BG+ is designed for use in orthopedic and spine fusion applications, foot and ankle procedures, and the surgical filling of bone voids. Its intended role is to provide a complete, bioactive material platform for use in environments where scaffold structure, surface reactivity, and compatibility with regenerative adjuncts are clinically indicated.

- Moldable and Flowable Putty
- Excellent Handling Profile
- Antimicrobial
- 5 Year Shelf Life
- FDA 510k Cleared

Item #	Description
945-1705	<i>APEX BG+</i> 5cc Putty
945-1710	<i>APEX BG+</i> 10cc Putty
