

# **UNDERSTANDING THE GLOBAL VISION OF THE IMPACT, “WE THE PEOPLE”**

**TODAY CAN AND WILL MAKE  
FOR HEALTHCARE CHANGE!**

Everyone in healthcare is highly connected and admired by clients, employers, peers, families, etc. Everyone thinks healthcare should and must get better. If given a simplified beneficial approach to how THEY can play a key role, they would be most likely be interested. Let's "Change Healthcare to Lifecare!"

The obvious starting point is with people connected in sales or management to networks within healthcare from C-Suite, to Products & Services, to Organizations/Providers. Each of these can instantly benefit and earn exponential revenue with referrals to our [Precision Healthcare Companies](#) 17 market sectors. This invaluable "Side Hustle" could easily become a booming career! [We're looking for leaders!](#)

Our "[Healthcare Founders Fund Trust](#) (HHFT)" now gives you an opportunity to also win by advancing short term, small amount, Bridge Loans (**not At Risk investment**) to emerging technologies. Why is there this need?

1. Many brilliant technologies have spent years and fortunes in funding their own development but need short term "Bridge Financing" to execute on active or pending contracts.
2. Traditional finance ignores these needs because they don't fit into their institutional modeling.
3. With these "Promissory Notes", being secured by contracts, growing Accounts Receivable, and interest in the company, these opportunities may very well be the safest type of Loan/Investment available to private citizens.
4. And we pay "Managing Partners" for these introductions; [for HHFT we pay in 24 hours!](#)
5. The fund could easily and quickly hit \$10 million if we all simply share the messaging.

NOW, each and every healthcare technology company that we assist, will also immediately have clients for the [Precision Healthcare Companies](#), where we have quite an array of revenue sources for those introductions as well. This not only provides a major market differentiator, but also provides revenue far faster than anything else being sold in healthcare today. Let's connect and get started!
