

# HEALTHCARE FOUNDERS FUND TRUST

## PROMISSORY NOTE

Our team of elite healthcare and financial experts has a long history of creating innovative growth and management solutions that find profit in delivering a superior continuity of care and patient satisfaction. In many cases, our ideas have gone on to or are now becoming the industry standard. Our mission is to evaluate and create best practice standards for the future.

We have a deep understanding of how each sector operates and set out to create a system of how it should operate. Our clients and Strategic Partners are physicians, groups, hospitals, ACOs, ancillary service providers, billing companies, EMR companies, and any other type of healthcare organizations.

A public company exit for any of our partners would have a big upside, as would an acquisition by a Private Equity firm. We invite your expertise in extending your healthcare, political, and social relationships on our behalf, as well as guide us on our path towards Changing Healthcare to Lifecare.”
