

CREATOR REVENUE TRACKER

A Simple Tool to Understand, Organize, and Grow Your Creative Income

Presented by NuCharter Funding Group
Creator Economy Initiative

Introduction

Creators today have more opportunities than ever to generate income from their talent, audience, and creative work.

A creator business may generate revenue from multiple sources, including music, content, merchandise, partnerships, digital products, and services. However, without tracking that income, it can be difficult to understand what is working, where growth opportunities exist, and how to prepare for future business opportunities.

The **Creator Revenue Tracker** is designed to help artists, creators, and entrepreneurs organize their income streams and gain a clearer picture of their business performance.

How to Use This Tracker

Review your revenue monthly and record:

- Where your income comes from
- How much each source generates
- Trends over time
- Which areas are growing
- Which opportunities deserve more attention

Consistent tracking helps you make better business decisions.

Monthly Creator Revenue Summary

Month: _____

Year: _____
