

AFTER SCREENING, STAFF OR STUDENT HAS

NO SYMPTOMS AND

NEGATIVE test
-or-
NOT tested
AND
CLOSE CONTACT
of someone with
COVID-19

SHOULD NOT attend in-person classes. Should use available remote learning options.

May return to building after quarantining* for 14 days from last date of close contact if no symptoms develop. If symptoms develop, get tested.

POSITIVE test

SHOULD NOT attend in-person classes. Should use available remote learning options.

May return to building after isolating for 10 days since the date of positive test collection.

ONE SYMPTOM

ONLY ONE SHORT-TERM¹ SYMPTOM which lasted less than 24 hours
AND
NO close contact of someone with COVID-19

MAY attend in-person classes if symptom has resolved.

ONE OR MORE SYMPTOMS AND

NEGATIVE test
-or-
ALTERNATIVE diagnosis
AND
NO close contact of someone with COVID-19

SHOULD NOT attend in-person classes. Should use available remote learning options.

May return to building after 24 hours have passed since fever resolved (without medication) **AND** symptoms have improved -or- if alternative diagnosis by health care provider, follow provider directions and isolate per condition diagnosed (whichever isolation is longer).

POSITIVE test

SHOULD NOT attend in-person classes. Should use available remote learning options.

May return to building after isolating for 10 days since the date symptoms started **AND** 24 hours have passed since fever resolved (without medication) **AND** symptoms have improved.

No test results available**
AND
NO close contact of someone with COVID-19
AND
CLOSE CONTACT of someone with COVID-19

SHOULD NOT attend in-person classes. Should use available remote learning options.

May return to building after isolating for 10 days since the date symptoms started **AND** 24 hours have passed since fever resolved (without medication) **AND** symptoms have improved.

SHOULD NOT attend in-person classes. Should use available remote learning options.

May return to building after isolating for 14 days since last date of close contact.

**When test result becomes available, follow flow chart above

***FULLY VACCINATED PEOPLE** (2 weeks after last vaccination dose) and people with confirmed COVID-19 infection in the previous 90 days do not need to quarantine after COVID-19 exposure. Watch for symptoms and wear a mask indoors for 14 days. If symptoms develop, follow flowchart.

COVID-19 SYMPTOMS

- Fever (100.4° F / 38° C or higher)
- Cough
- Loss of taste or smell
- Chills
- Shortness of breath or difficulty breathing
- Fatigue
- Headache
- Muscle pain or body aches
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

¹A **SHORT-TERM SYMPTOM** is defined as: A person has only one of the following symptoms (fatigue; headache; muscle pain or body aches; sore throat; congestion or runny nose; nausea or vomiting; or diarrhea) **AND** the symptom begins and resolves in less than 24 hours **AND** no known close contact COVID-19 exposure. A person can return to school the next day if the short-term symptom resolves. A COVID-19 test is not required.

CLOSE CONTACT DEFINITION

Close Contact includes anyone in one or more of the following categories:

- Been within 6 feet (2 meters) of a person with COVID 19 for a combined total of 15 minutes or more within a 24 hour period
- Live in the same household as a person with COVID 19
- Cared for a person with COVID 19
- Been in direct contact with saliva or other body secretions from a person with COVID 19 for example : been coughed on, kissed, shared utensils, etc.

If you've been exposed to someone with COVID-19 and you have no symptoms, Public Health recommends the following

1. Stay in quarantine for 14 days after your last contact. This is the safest option .
2. If this is not possible, stay in quarantine for 10 days after your last contact, without additional testing.
3. If the first two options are not possible, stay in quarantine for 7 full days beginning after your last contact and if you receive a negative test result (get tested no sooner than day 5 after your last contact). This option depends on availability of testing resources and may not be recommended in some settings.
