Helping Us Care for Your Child: Important Information for a Safe & Supportive Environment

To provide the best possible care and support for your child, we ask that you share any important information that may help us create a safe, inclusive, and nurturing environment. This includes health, developmental, and personal considerations that could affect your child's daily experience with us.

1. Does your child have any medical conditions, allergies, or dietary needs that we should be aware of to ensure their safety and well-being?
2. Are there any medications your child may need while in our care? If so, please provide any relevant details.
3. Does your child have any specific needs, preferences, or sensitivities that would help us create a comfortable and supportive environment for them?
4. Are there any cultural or family practices you'd like us to be mindful of while caring for your child?
5. Would you like to share anything about your child's emotions, or social interactions that could help us support them throughout the day?
6. Is there anything else you feel would be helpful for us to know to ensure your child has a positive experience in our care?

Thank you for taking the time to share this important information with us. Your input helps us create a safe, supportive, and nurturing environment where your child can thrive.
