

INTRODUCTION

Welcome to our 2020 brochure, with an ever-expanding product range this brochure once again contains our biggest selection ever! We are very excited for the launch of almost 140 new products across 22 ranges, all available in a selection of sizes. 2020 sees the launch of 12 fantastic and unique brand-new ranges, plus plenty of new options in our most successful and established collections.

Our Designer range continues to be one of our most exciting product collections. Each product range is exclusive to Think Rugs and each artist and designer offers a unique style and personality ensuring a varied and fashionable range across the board. All of our designer products are now made with 100% wool creating the perfect mix of modernity and quality.

An exciting addition to our tufted shaggy collections is our brand-new Teddy range. Consisting of 8 colours in a variety of sizes and shapes, including circles, the Teddy range is made with an extremely soft polyester yarn giving a truly unique feeling.

We have trebled the number of children's rugs we now have on offer with the addition of 12 new designs in 2 new qualities. Our digitally printed Inspire range offers a new level of detail and colour not previously available and the machine-made Brooklyn Kids offers incredible value and durability, both perfect for any children's rooms.

Influenced by the Moroccan Beni Ourain design which originates from the Atlas Mountains the Atlas range offers fabulous style and a super heavyweight feel. We love the feel and style of this product. Available in 2 styles and a total of 6 options in two sizes each.

Our most popular Royal Nomadic range sees 8 new additions for 2020, 4 new colour options in our top selling 7611 design, as well as 4 fantastic colours in our brand new 5741 design. With 19 options now available throughout the range customers are bound to be able to find their perfect rug!

A personal favourite addition is the pleasing Aurora range, our highest quality machine made range to date, the Aurora range gives even the best handmade qualities a run for their money. Available in a selection of muted, modern geometric designs in highly fashionable colour ways we believe that this range is bound to become a top seller.

Taking inspiration from marble and metallic trends the Craft range is manufactured using polyester and polypropylene to create a detailed and multi textured finish. Available in 2 stand out designs this range will definitely create a statement in any room.

The bold and distinctive Athena range comprises of 4 individual designs and a variety of colours. Machine made with a high-quality polypropylene yarn this range is a smart, stylish and contemporary collection.

2020 sees the biggest appraisal of our top selling Matrix range for a number of years. 6 brand new colour ways in our ever popular MT04 design as well as 15 new options across 3 new designs all using new colour options, creating what seems like a brand new collection. We are very excited to see the success of the range continue into the new decade!

And finally, the modern and trendy Vancouver range is constructed with a dense, heat set polypropylene which gives a matt finish and wool look. Created with up to date geometric designs and modern colours we believe that this range is set to become a top seller.

We are very proud of the new launches for 2020 and believe that they will all be incredibly successful. These, along with a large selection of our already proven ranges, mean that Think Rugs has a selection of over 340 products in an assortment of sizes. This means that it is easier than ever before to find your perfect rug. We are very excited about all that we have to offer in 2020 and hope that all of our customers enjoy everything that we have been working on.

THINK DESIGN, THINK STYLE, THINK RUGS.

DESIGNER RANGES

THINK DESIGN, THINK STYLE, THINK RUGS

The **Designer Range** has been developed for Think Rugs by professional designers & artists. Find out more about each of them here.

Each range is created using two luxurious materials, wool and viscose. The blend of these two components create a stunning product with a high density of tufting and soft finish.

The Inaluxe studio is located in the picturesque Grampians in Australia, where artists Kristina Sostarko and Jason Odd create. They share their space with one small girlie-girl dog named Kibi, and a girl rabbit (paradoxically) named Dennis Hopper.

The Inaluxe designs vary in theme and imagery, united by their distinctly organic and timeless nature. The desire is to connect with people through the artwork and evoke something positive, powerful, and real. It's about the personal journey.

Over the last four years, Jason and Kristina have created a unique portfolio of designs, available around the world as prints, stationary, accessories and home-wares. Some of their past and present clients include: IKEA, Blue Q, Earth Greetings, Kate Spade New York, Urban Outfitters, Maison Alice, Art Press, and King & McGaw. Their work has featured in various publications and books, including Uppercase, Frankie Magazine and Print & Pattern II by Bowie Style.

Kristina and Jason are avid collectors of second-hand books, music, furniture, and objects, with a passion for organic gardening, landscape design and renovating.

www.inaluxe.com

Sheffield-based Designer and Illustrator Michelle Collins creates beautiful digitally-painted pieces. After studying Art and Design at Art College, Michelle went on to specialise in Graphic Design at Derby University. This background in Design has shaped her passion for the geometric and minimalist aesthetic. Her work explores different ways of digitally painting and drawing through experimentation with texture, colour, space and shape. Michelle fuses this with inspiration drawn from the latest home interior trends to create artworks that are both fresh and modern.

HAND KNOTTED

Handmade by only the most skilled craftsman, the hand knotted production technique is the most time consuming method of all of our ranges. Knotting is used to attach the weft to the warp which in turn creates the pile of the rug. Each rug is unique and made with care.

All of our hand knotted products are made with 100% wool.

HAND TUFTED WOOL

The tufting process comprises of a tufter injecting the pile through a backing cloth from behind. Each pile is individually injected, the closer the tufts, the higher the density. Products of a higher density use a larger amount of material and are therefore more expensive. The quality of the wool is also important. All of our Hand Tufted Wool ranges are made with high grade wool and have over 250,000 tufts per square metre.

HAND TUFTED SHAGGY

The production of Hand Tufted Shaggy rugs is very similar to all other tufted products, this involves the tufter injecting the pile through a backing cloth from behind. Each pile is individually injected, the closer the tufts, the higher the density. To create a shaggy product the length of each individual tuft is increased drastically. Products of a higher density or longer pile use a larger amount of material, and therefore cost more to produce.

150cm x 230cm

HAND TUFTED ACRYLIC

Made in exactly the same way as Hand Tufted Wool. The tufting process comprises of a tufter injecting the pile through a backing cloth from behind. Each pile is individually injected, the closer the tufts, the higher the density. Products of a higher density use a larger amount of material and are therefore more expensive. The only variation in the production method is the material used. At Think Rugs all of our tufted acrylic products are made with 100% high grade acrylic.

MACHINE MADE

All machine made products are mass produced on four metre wide looms. Thousands of bobbins provide the yarn for each loom which produces products using a computer aided design program. The rugs are produced in four metre wide sections before being cut out and finished by hand. All binding, carving and trimming is completed by hand.
