

JALANI GLOBAL SERVICES LLC

Capability Statement

Jalani Global Services LLC (JGS) is a U.S.-based, SAM-registered small business delivering government procurement support and operational execution services to contractors, agencies, and enterprise clients across domestic and international markets. We operate where execution and compliance intersect, closing gaps in procurement, sourcing, and documentation so programs move forward without friction.

Our capabilities span two core service areas:

Government Procurement & Operational Execution JGS supports clients across the full procurement lifecycle, from sourcing and supplier coordination to delivery and operational follow-through. We maintain vetted partner networks and established supply channels across healthcare, information technology, security, logistics, construction, and transportation. Every engagement is structured around compliance, accountability, and measurable delivery, not general support.

SSP Documentation & ATO Support JGS provides targeted System Security Plan (SSP) documentation support aligned with Authorization to Operate (ATO) requirements under NIST 800-53 and the Risk Management Framework (RMF). We step into the documentation layer where execution and compliance begin to separate, organizing fragmented inputs, developing control narratives, and ensuring documentation reflects the actual state of the system. We do not replace internal teams or compliance providers. We bring structure and forward momentum to the process already underway.
