#1 chemical peel

CLEARER, BRIGHTER SKIN
in as few as 4 WEEKS

PIGMENT CORRECTING SYSTEM

ONLY AVAILABLE AT YOUR PRACTITIONER'S OFFICE

AM

VITAMIN C BRIGHTENING CONCENTRATE

PREVENT DARK SPOTS AND BRIGHTEN SKIN

All Vitamin C is not created equal. That's why we created this super-concentrated clinical strength treatment with 10% Tetrahexyldecyl Ascorbate, a super-stable and highly penetrable form of Vitamin C that diminishes the look of dark spots, defends against future skin-aging free radical damage, and diffuses discoloration.

RETINOL AGE-DEFYING TREATMENT MOISTURIZER

RESURFACE SKIN AND FIGHT SIGNS OF AGING

This multi-tasking daily moisturizer with 10% Glycolic Acid clears away dulling skin cells, free radicals, and discoloration while creating a pathway for optimal Retinol absorption to repair cells and stimulate new collagen formation.

PM

RETINOIC SERUM WITH 0.1% TRETINOIN

LIFT PIGMENT AND PROMOTE COLLAGEN AND ELASTIN PRODUCTION

Rapid-acting, **prescription only** 0.1% Tretinoin (pure Retinoic Acid) speeds results on dark spots, wrinkles and rough texture while revealing radiant, more vibrant skin. We paired Tretinoin with brightening Vitamin C to smooth out rough skin texture and diffuse dark spots. Moisturizing and protecting Vitamin E helps offset the dryness and irritation that commonly interrupts retinol treatment and results.

SKIN LIGHTENING COMPLEX WITH 4% HYDROQUINONE

ADVANCED DARK SPOT CORRECTION IN AS LITTLE AS 2 WEEKS

Help lift frustrating discoloration and unwanted pigment with dermatologist-grade, **prescription only** 4% hydroquinone. Hydroquinone works by stopping excessive pigment reduction at the source (the cellular level) while Kojic Acid and Licorice Root deliver a botanical brightening boost, as soothing Arnica and Mallow Flower Extract help keep inflammation at bay to prevent treatment interruption.

pigment correcting system

Real People.
Real Results.

AFTER 8 WEEKS USING VI DERM PIGMENT CORRECTING KIT

ERASE DARK SPOTS | BRIGHTEN SKIN | FIGHT FINE LINES
