GRID
CONSTRUCTION

Our journey started in 1995 as a family business in the construction business specializing in high end finish and fitout projects and remained so until today.

It started as a small start-up company tailored to the needs of the clients who want to build a long lasting family home and grew substantially while treating each member as family.

Through the connections of the founder, Grid became a known company that delivers high quality finishing while offering our clients the peace of mind and pride.

Quality and reputation are the basis for success and our clients satisfaction from start to finish is unwavering. We always put ourselves in the clients shoes to understand the vision from both the contractor and client point of view.

DESIGN AND BUILD

Through out the fully intergated offer we are deliver-
ing a single-source solution for our most prestigious
Client's dreams.

ONE TEAM - ONE OUTCOME

Meeting the needs of our Clients by offering a diver-
sified portfolio of products, INNOVATING DAILY and
selectively investing to increase the range of services
and activities offered.

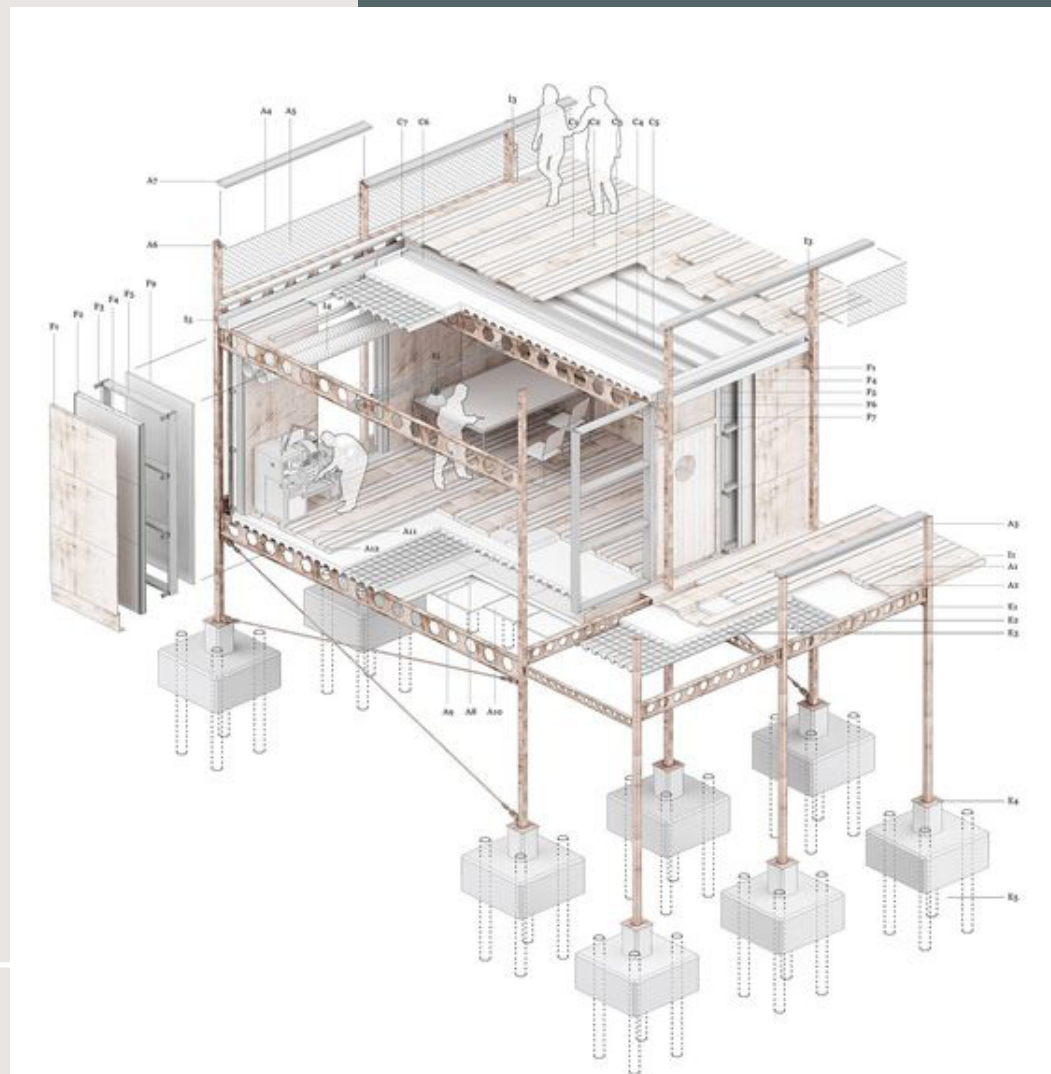

outcome

WORK METHOD BIM

By working with a BIM (building integrated model) system we are constantly updated on the progress of the design and cost of construction.

Our designers and construction engineers work together for the best result.
