DIRT RIDER

Amazing day and one amazing bike. While tailored for Ken Roczen, it wasn't unrideable for mere mortal men. The controls were all neutral, save for the exceptionally high rear brake pedal. The grips and seat were comfortable, and the engine package was strong yet extremely usable. RM-Z owners can replicate a large majority of what Roczen chooses to run on his RM-Z450, and the end result is a much improved platform for factory superstars and regular weekend warriors alike. *Jeff Allen*

DIRT RIDER

Iconic yellow rims are DirtStar ST-X supplied by D.I.D. Carbon fiber front brake rotor guard protects the factory Nissin caliper and Galfer rotor. Stopping power was strong yet controllable on Roczen's bike, and no special coatings were found on the fork lowers. *Jeff Allen*

DIRT RIDER

Galfer 280mm Oversized Tsunami Wave Rotor Kit with SP057 bracket. The Galfer steel-braided line is affixed by a safety-wired banjo bolt. A Nissin front caliper is one of the only difficult to obtain/unobtainable pieces on the Travis Soules-prepped machine. *Jeff Allen*
