

The Great Indian Treasure™ is a matchless Simulation based learning experience.

'TGIT'® - is a researched product and a high-energy Business Simulation.

Each team has to identify an appropriate route and the right resources to reach to the mine and mine for treasure. Teams have limited time during their journey to mine for treasure and get back home. They can choose from different paths with varying risks, planning for weather and optimal use of resources. Each team member plays a key and defined role in the overall journey.

THE GREAT INDIAN TREASURE™

The Experience

Teams rush to compete against each other in this challenging race through different routes to reach the treasure in the mountains.

Their goal is to get to the mountains and mine for as much treasure as possible and return home alive. The objective is to maximise ROI and give best results. Though the teams perceive that they need to compete against each other, the focus is on how teams collectively strive and succeed.

The Details

Overview

‘The Great Indian Treasure™ - collaboration series’ is a business simulation that simulates the dynamic environment with a focus on taking ownership, building trust and increasing collaboration which further is linked to quality, leadership, best practices, customer needs, and a variety of other organisational issues. The pressures and anxiety experienced in ‘The Great Indian Treasure™ - collaboration series’ are related to those experienced daily in a hectic work schedule.
