

2023 Winter League

The 2023 Winter League will start January 22nd and run through February 26th. Each shooter will shoot 50 targets per week for 4 weeks for a total of 200 targets. Each week's targets are broken down into two 25-target rounds. The first round of 25 will be shot from the 16-yard line. The scores recorded in the first round will be used to determine the yardage at which the second round will be shot. The yardage can range from 16 to 27 yards, with the better shooters shooting from the farthest distance. A team is made up of five shooters. It is strongly encouraged that you shoot as a team. However, shooters may shoot without their team to get ahead or make up for missed weeks. The top 2 teams in each class will be awarded cash; paid 60/40 based on a Lewis-Class payout system. There will be 1 class per every 4 teams. The cost is \$70 per shooter to be paid prior to shooting your first league score. Each shooter must provide their own shells. Shells will be available at the club.
