

A SMALL CHANGE. A MAJOR STEP FORWARD.
EASY TO DON. EASY TO TIE. EASY TO PROTECT.

“EASY-TIE” GOWN

DONNING INSTRUCTIONS

STEP 1

Put on the gown as you normally would— insert arms into sleeves and secure the neck closure. The “Easy-Tie” design is compatible with all standard gown closures, including over-the-head, ties, adhesive, and more.

STEP 2

With the hand opposite the shoulder where the tie originates, grasp the tie anywhere from mid to lower ribcage, wherever feels most comfortable.

STEP 3

Lift the tie up and over your head, bringing your hand down along the opposite side of your body to waist level. This motion moves the tie across your back without needing to reach behind.

STEP 4

Once your hand is at your waist, pull the tie slightly outward to gently close the back of the gown. This can also be done during the downward motion.

STEP 5

Wrap the tie across the front of your body and secure it to the shorter tie at your waist— either in the front or at the side, based on your preference.
