

MULTI TACTICAL UTILITY BELT

The latest innovation from MGEAR brings together the ultimate; form fit and functions on your utility belt.

This modern tactical belt uses our patent pending buckle mechanism design with neodymium magnets to attract and securely lock the two parts of the buckle together.

The locking and releasing of the buckle is so easy and seamless that it can be done with just one hand and had proven itself to be very reliable during extreme trails.

The front of the buckle serves as magnetic holder to keep a small coin knife, which not just looks awesome but practical and handy for everyday needs.

Like the MGEAR Multi tool wallet you can also customize the look of you buckle from different textures of Kydex and Holstex materials.

- Buckle assembly is made out of aluminum, layered with Kydex and Holstex engineered thermoplastic.
- Neodymium Magnetic locking mechanism.
- Strong Quality 38mm Nylon Webbing.
- Size 42 (max), can be cut to size (use flame to melt the end).
- Micro Folding Coin Knife included.
