

Custom Spray Tanning

PREPARE

- Shower / Exfoliate / Shave / Dry Brush at least 4 hours before your appt. Use oil free exfoliants.
- If you must shower right before your appointment, finish off with a cold rinse to close your pores to avoid a patchy, discolored tan.
- DO NOT apply any oils, moisturizers, deodorant or makeup after showering. This may prevent the tan from adhering.
- Be sure to have all beauty services complete prior to Spray Tan Day. This includes waxing, nails, facial, massage, etc. Getting these done right after will lighten/rub off your gorgeous tan.
- Wax 24 hours (or more) before your appointment. Wax can stay on the skin and make it difficult for the tanning solution to hold.
- Book your appt. within a few days of your event to give your skin time for the tan to fully settle.
- Wear loose fitting, dark clothing to your appt. and flip flops or sandals to ensure the tan will not wear off. No denim, no yoga pants, no tight bras. We have disposable underwear/bra for you to wear. You may opt to wear nothing or we suggest a dark colored bathing suit of your own. Tan lines or no tan lines? Up to you! You will be given additional drying time before putting clothing back on.
- The product has a quick-develop bronzer in it. It will get darker between 4-8 hours after your appt. Don't worry, the darkness will wash off after your 1st shower revealing a beautiful glow. Avoid skin getting wet until you shower.

AFTERCARE

- You can shower in 4-8 hours. We recommend not showering for 8 hours for maximum result. You will see some bronzer wash away in the shower – this is normal! It is only the outer shell of the tan that looks very dark and rinses away.
- DO NOT exfoliate unless you want to say goodbye to the tan. Exfoliating will wash it off. Use gentle soap/cleanser to shower. No loofahs or wash cloths. Just rinse! Avoid super hot water, pat dry and moisturize, thoroughly.
