

Quick Installation Guide

AC1200 Wireless VDSL/ADSL
Modem Router

Archer VR400

1. Connect the hardware

2. Connect your devices

Your router comes pre-configured for use. All information required to connect such as WiFi name and password can be found on the sticker on the underside of your router.

NOTE: You have two SSIDs (Network names) one for 2GHz ending in _2G and one for 5GHz ending in _5G if your device can see the 5GHz network it is recommended you connect to this one as network performance is enhanced in this band.

Administer your router (advanced)

You can manage your router using the TP-Link tether app or a web browser (by putting <http://192.168.1.1> in the address bar)

1. Download the TP-Link Tether app.

Or:

Scan To Download

2. Connect your smartphone to the router

SSID (network name) and Wireless Password are on the sticker on the underside of your router.

3. Launch the Tether app and select Archer VR400

4. Follow the steps to connect to your router

Note: Your admin password is on the sticker on the underside of your router
