

roboranger
BY XERATECH ROBOTICS

YOUR RANGE, MADE SIMPLE.

Proven Performance

Trusted by over **50 golf courses** over the past 4 years, the Roboranger has earned rave reviews from course owners, general managers, and superintendents alike. With a **3000+ Ball Capacity**, the Roboranger leaves a lasting impression.

Power Capacity

The Roboranger is stronger than ever, during a recent test it was powerful enough to **tow a medium-sized sedan**! Our robot is equipped with a **48v 160ah Lithium Ion Battery**, which runs for **24-hours straight** on a 10-hour charge.

Rock-Solid Reliability

From the heat of Dallas summers to the icy winters of Toronto, our robots are built to **perform in all conditions**. Our tow-behind picker **reduces** the possibility of **jackknifing reels**, resulting in less reels needing replacement each season.

Unmatched Precision

Our robots mow with **pinpoint accuracy**, cutting & picking within **1-inch** of the targeted area. Plus, our proprietary randomized algorithm assures the robot is **changing its trajectory** with each cycle, reducing wear and tear on your turf.

Safety Features

Our robots are equipped with **industry-leading safety features**: a front safety bar, anti-skid software, an overheating-proof battery, and an AI camera model for obstacle detection. Our **advanced mapping** assures your robot stays within its boundary.

User-Friendly & Low Maintenance

Compact and easy to handle, our robots need **minimal training**, fit seamlessly into **any range shelter**, and **charge from a standard 110V outlet**. We pride ourselves on **quick support**, resolving most issues within 24 hours — often even faster.

Positive Impacts

Environmentally Friendly

Switching to an electric picker is the equivalent of saving 28.3 metric tons of CO₂ per year. That's 1,190 trees!

Noise Reduction

Our picker is roughly 30 dB quieter than gas-powered pickers, allowing your players to focus on their swing

Safety First

No need to worry about people driving up steep terrain, our robot is designed to take on slopes of >30°

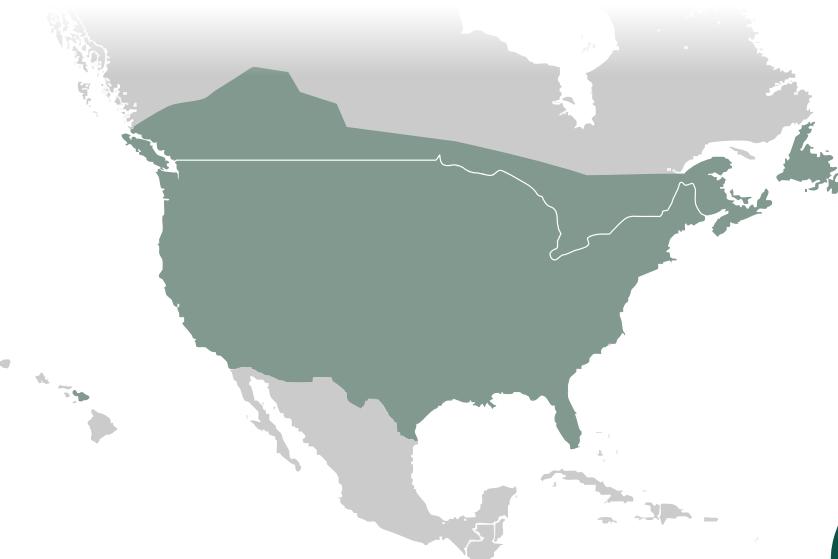

Less Time Picking

Our robot isn't designed to replace jobs; it's meant to free up time, allowing staff to focus on providing a better overall guest experience.

RTK Coverage Map

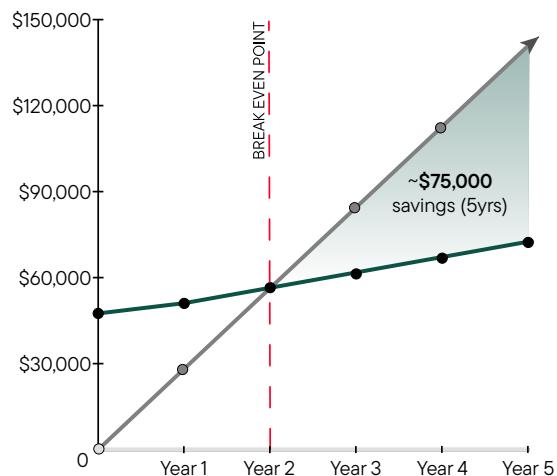

Includes the entirety of the mainland USA, and southern Canada

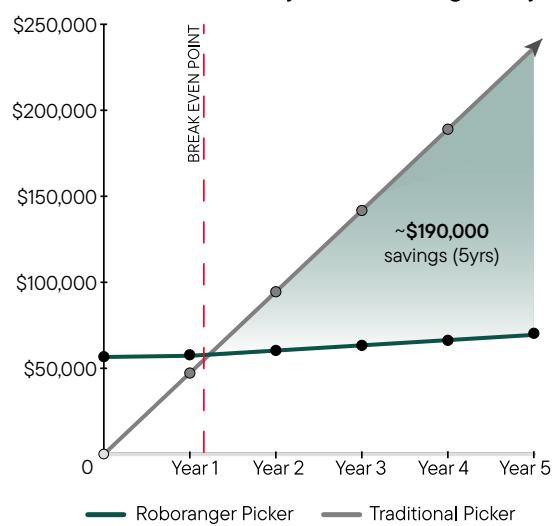

■ = RTK ready (coverage available)

Full coverage expands to the majority of continental Europe, select Brazil regions, South Korea, and select Australia regions

Cost Efficiency - 4h Picking a day*

Cost Efficiency - 8h Picking a day*

*assumes an hourly wage of \$15/h, avg fuel costs of \$3/gal, est. insurance & maintenance costs. The purchase plan was used in this cost breakdown. Savings can vary based on factors such as course location, & more.

Easy to use mobile-remote included!

Customizable in-app scheduling feature
