

- SMART CBD VENDING -

CBD

Cannabidiol, or “CBD”, is sweeping the country as the newest miracle product. If you are a beneficiary of CBD products and trying to sell it so others can be blessed by its amazing results, then you would probably agree that CBD products are not easy to market and sell. We understand that CBD products come in many different shapes and sizes, and can be hard to fit in standard vending machines.

The OMNI VISTA Custom CBD vending machine will accommodate large and small product sizes. They have virtually no limitations when it comes to the size, shape, or material of what CBD products you want to vend. It can deliver the products safely with its state-of-the-art conveyor belt and elevator delivery system. Yes, even glass bottles are safe to vend from the OMNI VISTA CBD vending machine!

The massive 43” touch screen media player allows your customers to interact with the machine and learn more about each product being sold. The key to the OMNI VISTA is your ability to completely customize the machine, inside & out, to perfectly meet your unique product requirements and promote your brand.

Also, the OMNI VISTA machine has a large steel plate behind the huge touchscreen which prevents theft in the event the glass is broken giving you added security and peace of mind.
