

One Product | Multiple Uses | Water-Based | Safe & Biodegradable

## Dynasoak™

Cleaner | Degreaser | Soil Remediation | Odor Control | Solids Control

Dynasoak can be used in many industrial markets including oil & Gas, ships, shops, municipal solid waste handling, buildings, and manufacturing facilities. Its water white clear color makes it perfect for a number of different applications where cleanliness and minimal residual materials are required.

Dynasoak is clear in color and typically used in hospitality, restaurants, hotels, casinos, schools, and municipal waste water facilities. Because it's clear, it's particularly good for any color sensitive markets.

Dynasoak is also used in hydrocarbon recovery, bioremediation of oil and hydrocarbon spills in land, soil, surfaces and water. It activates the oil and hydrocarbons for fast biodegradation by the local bacteria.

Dynasoak is the safest, most versatile, effective and economical solution to any hydrocarbon challenge. It can be used as degreaser and cleaner. Some uses of Dynasoak are indicated below.

### Environmentally Safe Degreaser:

- Air Handlers
- Auto Engines
- Bathrooms
- Compressors
- Concrete
- Decks
- Docks
- Engine Rooms
- Fans
- Filters
- Grease Traps
- Kitchens
- Lockers
- Molds
- Motors
- Oil rigs
- Tanks
- Tires
- Truck Body
- Water Line Scum
- Walls

### Environmentally Safe Cleaner:

- Appliances
- Asphalt
- Cabinets
- Ceilings
- Concrete
- Equipment
- Floors and Counter Tops
- Fiberglass
- Gills
- Metals
- Mildew
- Ovens
- Plastics and Rubber
- Showers
- Sinks
- Steel
- Tile
- Tubs
- Vinyl
- Wax stripper
- Walls

**Dynasoak** is a safe, non-toxic, extremely effective general-purpose cleaner, degreaser, deodorizer and bioremediation enhancement agent used for cleaning and maintaining all surfaces and environments. The effluent from the use of **Dynasoak** is beneficial to wastewater treatment plants, grease traps, separators, and the environment. It is a perfect choice for applications where there is a need to clean, deodorize and biodegrade hydrocarbons, oils, greases, and fats all in one step. Through application engineering **Dynasoak** can be adjusted to fit just about any application.

#### **Dynasoak is:**

- Non-Toxic Readily-Biodegradable
- Non-Flammable
- Non-Corrosive
- Non-Reactive
- No-Solvent
- No-VOC
- Water-Based

#### **Industries:**

- Oil & Gas (Upstream, Midstream & Downstream)
- Municipal Waste (Transfer Stations, Vehicle Maintenance, Landfill, Wastewater)
- Hospitality (Schools, Restaurants, Casinos, Hotels)
- Office Floors, Manufacturing Floors and Warehouse Floors
- Meat Production Facilities
- Industrial Facilities
- Manufacturing Facilities

#### **Applications:**

- Cleaning & Degreasing
- Pressure Washing
- Spill Cleanup & Site Remediation
- Underground Remediation
- Hydrocarbon Remediation
- Gunk and Solids Removal
- Tank Degassing
- Anti-Slip Floor Cleaner
- Odor Removal
- Hydrocarbon Recovery

#### **Uses:**

Dilute 1 part of **Dynasoak** in 10 parts of water for heavy cleaning or water dispersing. Dilute in 20-30 parts of water for mild cleaning, steam washing or pressure washing. Dilute in 5 of water parts for soil bioremediation.

#### **Product Formats:**

2 oz, 16 oz, ½ gallon, 1-gallon, 5-gallon pail, 55-gallon drums, 330-gallon totes & 5,000-gallon truckloads.
